

FOOD GRADE & ASEPTIC PIPE FABRICATION

The PSS Tank Lining division provides our customers with the latest technology for their Food Grade commodity storage & process vessels.

SPECIALTY WELDING IS
OUR FOCUS.

ALL TYPES OF METALS

- Steel
- Stainless Steel
- Aluminum
- Exotic Materials

FOOD GRADE & ASEPTIC PIPE FABRICATION & INSTALLATION

Sanitary welding is vital to successful Food Grade installations. Our Installation technicians and welders understand that even the smallest amount of bacteria growth can render your product useless. That's why we offer sanitary welding services for our food grade customers. It's vital that you trust the welds in your equipment. We help you achieve that peace of mind.

SOLUTIONS

For a variety of storage surfaces.

We provide solutions for a variety of storage surfaces including Carbon Steel, Concrete and Alloys. Whether your concrete tank needs resurfacing / relining or your stainless-steel tank is experiencing corrosion stress cracking, PSS has a solution that will meet your need for years into the future.
